

The Primary and core working of the app

CORE OBJECTIVE

Claimit, the app is a media specific facilitation application between the seller and the buyer.

A customer care and loyalty programme app between the seller and buyer. It can be used by all kinds of shops and other business establishments for their customers to keep them loyal, happy and satisfied.

The app is an ultra local business promotion platform to cater for 5 kilo meter radius. It works through the pin codes.

The idea is some merchants/other business establishments can't give any discounts to their customers because of low margins but want customer loyalty, so they can give free redeemable rewards and 1% cashback. Some merchants/other business establishments can give Discounts for their regular customers for loyalty because they have high profit margins. Also get 1% cashback plus redeemable rewards worth the final Bill.

Both the case, the Merchants also get 1% cashback, if the customer claim the rewards through the formal process.

The App is the media between the Buyer and the seller.

The app has 31 different kind of categories with sub categories of merchants and other business establishments. The merchants should have a billing system. The merchants are like, grocery, supermarkets, spa, saloon etc.. and the other business establishments include schools, hospitals, kinder gardens etc...

CORE STRUCTURE

The app has primarily two kinds of applications and secondarily 5 different advertising portals.

Group1 (Reward Zone) : Gives free redeemable reward points worth the bill plus 1% cashback to the buyers and 1% to the merchant.

Group 2 (Redeem Zone) : Gives Pre set (while they register) Discount against reward points plus additional reward points worth the final bill and 1% cashback. Also the merchant gets 1% cashback.

The app is an ultra local engine designed for Pin code based works within 5 km radius.

THE PROCESS

1. The Seller will have to subscribe (affiliate) to the app in one of the two group. The price of the subscription is same for both.
2. The Buyer will have to download the free app and subscribe themselves.

3. Rewards getting process :
Every time when they visit the G 1 zone, once the billing is over, they need to scan the bill through the inbuilt scanner and submit. Automatically it will track the shop name, date, bill amount, convert in to reward points and calculate 1% of the bill as cashback, to their wallet in the app. Both the buyer and the seller.
4. Redeem Process :
The buyer should be able to search the redeem zones (search engine, Redeem Zone at the center button menu and the footer) in the app, when they find a center, they visit the place, once the billing is about to happen at the billing point, the buyer should open the app, click the particular place in the app redeem spot, it will open to a new page says “ I am eligible to get the prescribed discount here” show it to the billing executive, the executive will deduct the discount (agreed at the subscription) and gives the final bill.
Again, the buyer will have to scan the final bill and submit to get additional reward points and 1% cashback at G 2 zone.
