

CLAIMIT

App Menu & Screen Guide

A reference guide to every menu, tab, and screen in the Claimit mobile app — what each one is for and how to get to it. Built directly from the app's navigation structure so it matches what is actually in the app.

Prepared for users & shop owners · 22 August 2026

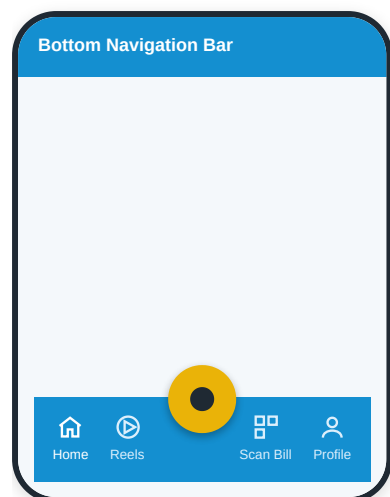

Contents

1. How the app is laid out	3
2. Bottom navigation bar	3
3. Featured Zones — the main menu	4
4. Getting started (splash, onboarding, sign-in)	5
5. Home screen	6
6. Scan Bill & Rewards Wallet	7
7. Claims & Insurance Policies	8
8. Shops, Deals & Redeeming Points	9
9. Reelz & Learn Claimit	10
10. Claimit Select (book local professionals)	11
11. Local Classifieds & Local Finds	12
12. Notifications	13
13. Profile & Settings	14
14. For shop owners	15

This guide is built from the app's actual navigation code (every screen and menu button, and where each one leads), not from photographed screenshots — the diagrams below are simplified layout mock-ups, not camera captures of the live app. Colours, icons, and button positions match the app's real design.

1 & 2 — How the App Is Laid Out / Bottom Navigation Bar

Every screen in Claimit is reached from one of two places: the **bottom navigation bar**, always visible at the bottom of the screen, or the **Featured Zones** menu, opened with the round yellow button in the middle of that bar. Section 3 covers Featured Zones; below is the bottom bar itself.

1 Home

Your dashboard — claim stats, reward points balance, quick actions, and recent activity. This is the screen you land on after signing in.

2 Reels

A vertical, swipeable video feed ("Promo Reelz") of short local shop and brand promotions — like a shopping-focused reels feed.

★ Yellow centre button

Opens the **Featured Zones** menu — the app's main hub linking to every major section (see Section 3). Tap it any time from any of the 5 main tabs.

3 Scan Bill

Opens the camera-based bill scanner directly — photograph a purchase receipt to earn reward points. The fastest shortcut to the app's core loyalty feature.

4 Profile

Your account: personal details, cashback wallet, reward-points history, favourites, and the Settings menu.

Two more screens are reachable from the top of the Home screen but are not in the bottom bar: tap the **location chip** (top-left) to change your delivery/discovery area, and the **bell icon** (top-right) to open Notifications.

3 — Featured Zones: the Main Menu

Tapping the yellow button in the bottom bar opens a pop-up grid called **Featured Zones**. This is the fastest way to reach any part of the app. It has two pages — five zones plus a "More" tile, then four more zones on page two.

Zone	What it's for
Reward Zone	Explains and tracks the bill-scanning reward loop — how many points you've earned, and how scanning purchase bills turns into reward points.
Redeem Zone	Where you spend your reward points at a partner shop. Checks that your balance is enough (eligibility check), then walks you through redeeming at checkout.
Nearby Deals	Deals and offers from shops near your current location, sorted by distance.
Brand Deals	Offers and promotions run by larger brands/advertisers (as opposed to individual local shops).
Promo Reelz	Same short-video feed as the Reels tab — shortcut to it from the menu.
More	Flips to the second page of the Featured Zones menu (does not leave the pop-up).
Local Finder	Directory of local shops and businesses in your area, with the plans/registration flow shop owners use to list their business.
Claimit Select	Book local professionals and services (e.g. home services/experts) — browse professionals, view profiles, book a slot, and message them directly. See Section 10.
Local Classifieds	A buy-and-sell marketplace — browse listings by category or post your own item for sale.
Learn Claimit	Short how-to-use-the-app video lessons. Tap a question to watch a fullscreen answer video (with a like button) — content is added by the Claimit team and updates without needing an app update.

4 — Getting Started: Splash, Onboarding & Sign-in

Screen	Purpose
Splash screen	Brief animated Claimit logo shown while the app checks whether you're already signed in.
Onboarding (3 slides)	First-launch introduction — "Enjoy" (rewards & discounts), "Scan" (scan a bill), "Shop" (spend at partner shops) — explaining the core reward loop before you sign up.
Register	Create an account with your name, phone number, and email.
Login	Sign in with your phone number, or continue with Google / Facebook.
OTP verification	Enter the 6-digit one-time code sent to your phone to verify it's really you.
Complete profile (social sign-in)	Shown only if you signed in with Google/Facebook — adds the missing phone number or email so your account is complete.
Success screen	Confirms registration/verification succeeded before taking you to Home.

Demo note: during development the OTP code is fixed at **123456** for testing — this will be replaced by a real SMS code before the app goes live.

5 — Home Screen

Home is what you see first after signing in, and the screen the "Home" tab always returns you to. It brings together a snapshot of your account and the fastest paths into the rest of the app.

Element	Purpose
Location chip (top-left)	Shows your current area; tap to change it — deals, shops, and search results are all sorted by distance from here.
Notification bell (top-right)	Opens Notifications; a dot appears when you have unread ones.
Stats overview	At-a-glance totals: claims filed, active policies, and current reward points.
Quick action tiles	One-tap shortcuts to the most-used actions (e.g. scan a bill, file a claim).
Recent claims list	Your most recently filed insurance claims and their current status.
Category browser	Grid of shop/deal categories (31 categories) to browse by type — groceries, electronics, fashion, and so on.

6 — Scan Bill & Rewards Wallet

This is Claimit's core loyalty loop: photograph a shopping bill, the app reads it automatically, and you earn reward points you can redeem at partner shops.

Screen	Purpose
Bill Reader intro	Short explainer shown the first time you open the scanner.
Choose type	Pick what kind of bill you're scanning (affects which reward rules apply).
Scanner (camera)	Live camera view with a flash toggle and on-screen guide to frame the bill.
Scanning progress	On-device text recognition reads the merchant name, date, and total from the photo — no internet needed for this step.
Confirm	Review what was read off the bill and correct anything before submitting.
Success	Shows the reward points you just earned.
Review pending	Shown if a bill needs manual review before points are awarded (e.g. unclear scan).
Rewards Wallet	Your cashback balance, lifetime points earned, total scans, and a full transaction history of every scan and redemption. Reached from Profile → Cashback Wallet, or the Reward Zone menu tile.

7 — Claims & Insurance Policies

Screen	Purpose
Claims list	Every claim you've filed, with a status badge (pending / under review / approved / rejected / settled).
New claim	Multi-step form to file a claim — type, description, linked policy, and claimed amount.
Upload documents	Attach photo/document evidence to a claim (from camera or gallery).
Claim detail	Full claim record with an interactive timeline showing every status change and when it happened.
Policies list	All insurance policies you've added (health, motor, home, life).
Policy detail	Full details of one policy — insurer, policy number, premium, coverage amount, and validity dates.

8 — Shops, Deals & Redeeming Points

Screen	Purpose
Shops list	Local shops filterable by category, sorted with the nearest and premium-listed shops first.
Shop detail	A shop's photos, offers, and rating. Shop owners: this is also where the "Claim Your Business" banner appears if your shop was bulk-added by Claimit and hasn't been claimed yet — tap it to start the ownership/registration flow on the website.
Deal detail	Terms, discount, expiry, and merchant for a single deal or offer.
Brands / Nearby Deals	Deal lists filtered to brand-run offers or to what's closest to you (also reachable from Featured Zones).
Redeem eligibility	Checks you have enough reward points before letting you redeem at a shop.
Redeem loading / success	Processes the redemption and confirms it went through.
Categories	Full grid of all shop/deal categories, for browsing beyond what fits on the Home screen strip.
Search	Search across shops, deals, and classifieds at once.

9 — Reelz & Learn Claimit

Screen	Purpose
Reelz feed	Full-screen, swipe-to-scroll short videos posted by shops and advertisers to promote offers.
National Ads	Full-screen viewer for nationally targeted ad campaigns (rather than local ones).
Learn Claimit — list	List of how-to-use-the-app questions, each with a short video answer. Content is managed by the Claimit team and can be updated without an app release.
Learn Claimit — video	Fullscreen video player with sound, a mute toggle, and a like button.

10 — Claimit Select (Book Local Professionals)

Claimit Select is a booking marketplace for local professionals and services, separate from the shops/deals side of the app.

Screen	Purpose
Select home	Landing page for the Select marketplace — browse categories of professionals/services.
Professional list	Professionals available in a chosen category, filterable.
Professional profile	A professional's details, services offered, and reviews.
Book	Choose a time slot and confirm a booking with the professional.
My bookings	All bookings you've made and their status.
Register (as a professional)	Sign up to be listed as a Select professional yourself.
Messages / Chat	Direct messaging between you and a professional you've booked or contacted.
Select profile	Your Claimit Select account settings, separate from your main Claimit profile.

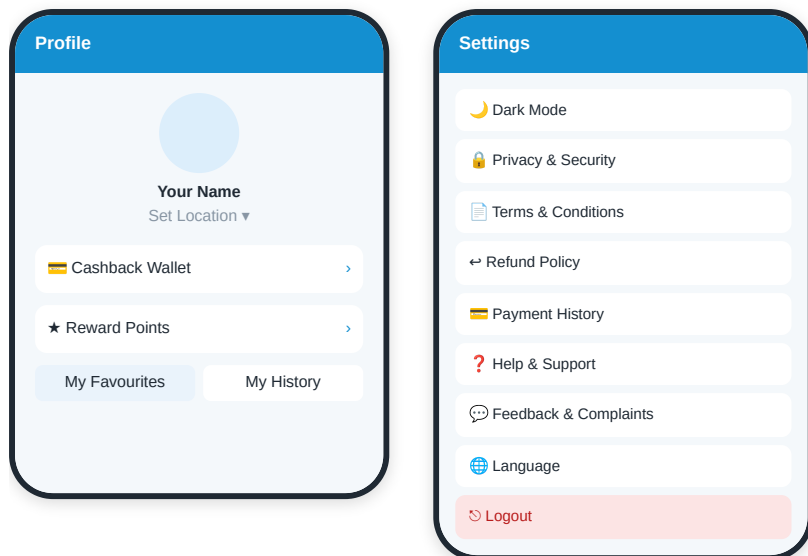

11 — Local Classifieds & Local Finds

Screen	Purpose
Classifieds home	Landing page for the buy/sell marketplace, with category shortcuts.
Classifieds ads list	Browse all posted classified listings.
Listing detail	Photos, description, price, and seller contact for one listing.
Add listing	Multi-step flow to post an item — category, photos, details, then review before publishing.
My listings	Manage the classifieds you've posted (edit, mark sold, remove).
Local Finds zone / categories	A separate local-business directory (shops, services) with its own category browser — this is what shop owners register through to get listed.
Local Finds — add / mine	Register a new local business listing, or manage the ones you've already added.

12 — Notifications

Element	Purpose
Notifications list	All notifications — claim status changes, reward updates, deal alerts, and system messages.
Unread badge	A dot on the bell icon (Home screen) and this list shows how many are unread.
Mark all as read	Clears the unread state for every notification at once.

13 — Profile & Settings

Item	Purpose
Edit profile (pencil icon)	Update your name, email, DOB, address, and avatar photo.
Settings (gear icon)	Opens the Settings menu shown above.
Cashback Wallet	Your available balance, lifetime earnings, total scans, and reward points — with a "Transfer to Bank" option for cashback.
Reward Points	Your current point balance and how points were earned/spent.
My Favourites	Deals and shops you've bookmarked.
My History	A combined log of every bill scan and point redemption.
Dark Mode	Switches the app's colour theme between light and dark.
Privacy & Security / Terms / Refund Policy	The app's legal documents.
Payment History	Record of payments made through the app (coming soon).
Help & Support	Contact and support information.
Feedback & Complaints	Submit feedback or report a problem directly to the Claimit team.
Language	Change the app's display language (coming soon — Hindi, Tamil, Telugu planned).
Logout	Signs you out of your account on this device.

14 — For Shop Owners

Shop owners use the same mobile app as customers, plus a few extra touch points aimed specifically at running a listed business. Full shop management (adding offers, viewing analytics, editing your shop page) happens on the separate Claimit web portal — but these parts of the mobile app matter to you directly:

Where	Why it matters to you
Shop detail page	This is your shop's public page as customers see it — photos, offers, and rating. Check it the way a customer would.
"Claim Your Business" banner	If your shop was added in bulk by the Claimit team, this banner appears on your shop page until you claim and pay for it. Tapping it opens the registration page on the Claimit website.
Ratings & reviews	Customer ratings left on your shop page — visible to you and to anyone browsing shops.
Local Finder / Local Finds	The listing your business appears under when customers browse by area or category.
Redeem Zone	Where customers redeem reward points in person at your shop — good to understand the flow your customers go through.
Feedback & Complaints (Settings)	The direct channel to raise issues with the Claimit team, e.g. about your listing or payments.

For day-to-day shop management — editing your shop profile, creating offers, and viewing view/redemption analytics — use the Shop Owner web portal, not the mobile app. Ask if you'd like a separate guide to that portal.
